 - chimpanzees selecting particular sticks to use for extracting termites
 - a baboon hunting prey
 - an orangutan climbing a tree
 - a male gorilla beating his chest
- Which of the following IS NOT associated with Charles Darwin's views on evolution and natural selection?
 - species are not susceptible to environmental pressures
 - genetic variability is necessary for natural selection
 - evolution proceeds gradually
 - natural selection is the mechanism that explains the process of evolution
- You believe that species gradually change over time in response to their environment that this reflects descent through genetic inheritance. Your beliefs align with which of the following concepts?
 - natural selection
 - reproductive fitness
 - cultural ecology
 - evolution
- Strabo, was a Geographer.
 - Greek
 - Roman
 - Arab
 - German
- "Place-work-Folk" was postulated by
 - E.C. Sample
 - Frederich Le Play
 - Humboldt
 - Strabo

8. Isaiah Bowman supported...
- a. Determinism
 - b. Possibilism
 - c. Neodeterminism
 - d. None of these
